SWIM AND FITNESS SPAS

Swim Spa of the Year

Voted "Swim Spa of the Year" by Top 10 Reviews, an independent company, PDC Spas is proud to be the leader in the industry with product design, performance, reliability and company support. Our swim and fitness spa collection offers our advanced dual propulsion, jetted swim and fitness resistance currents in a variety of lengths, ranging from 19' to our space conscious, 12' Vitality fitness spas. With 20 unique models to select from, PDC Spas has the perfect spa to fit your home and budget, backed by a trusted 35 year warranty and knowledgeable, factory direct customer support.

TruSwim®, Patent Pending Propulsion Technology

To create the widest swim path available, dual hydraulic propellers are positioned side-by-side for an even resistance and water flow. Measuring nearly 42" wide and delivering up to 5,000 gallons per minute, the TruSwim® swim path is the widest and strongest, leading all swim spa technology. Ideal for all ages and fitness levels, the adjustable TruSwim® TruSwim® current is perfect for all types of aquatic exercise, wellness therapy and swimming enjoyment.

Unique Shell Design Optimizes Fitness

With the PDC Spas TruSwim® shell design, the propelled swim current remains separate from the return path thanks to the straight sidewall design. This assures the swimmer a wide, smooth fitness path, free from turbulence, for the optimum in aquatic fitness. This unique flat wall design is a symbol of manufacturing expertise and performance excellence, offering the only unobstructed fitness path on the market.

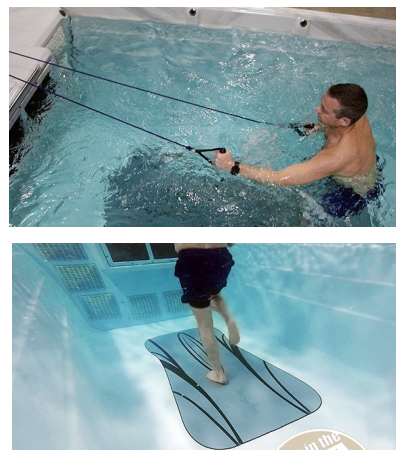

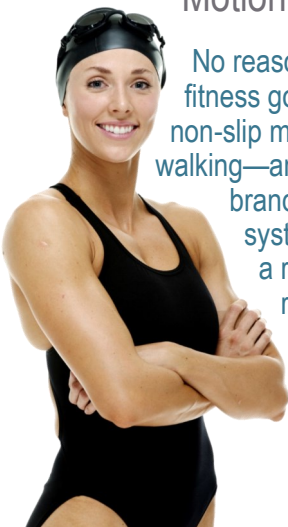

Reliable Water Care Standard on All Models

WHERE INNOVATION and FITNESS MEET.

Standard on all swim and fitness models, EverPure2™ with EverLite2™ offers a reliable, proven sanitation process often used in the drinking water industry. The powerful oxidation properties of the natural sanitizer ozone is combined with UV-C for clear, pure water requiring less harsh chemicals and meeting the demands for a "greener" purification method. A step above other brands, is the standard EverLite2™ indicator. A simple glance at the cabinet panel indicator light will provide confidence your spa is hard at work delivering crystal clean water.

MotionMat™, AquaCross™ & AquaForce™ Fitness

No reason to buy a bulky, high-priced treadmill when you can reach your fitness goals using the PDC Spas MotionMat™. The graphic designed, non-slip mat provides the perfect cushioned surface for running, jogging, walking—any routine desirable with a significant price savings over other brands. Standard on several models, the AquaForce™ pulley band system offers upper body and core fitness at a fraction of the cost of a rowing machine. Complete your fitness goals with the added resistance from our tether AquaCross™ system building strength, stamina and overall wellness.
